

Welcome to the Forlinx Embedded Documentation

This platform provides **comprehensive software and hardware development documentation** for Forlinx Embedded products, including:

- System flashing
- Driver porting
- Kernel compilation
- Debugging tools
- And more

Our goal is to help engineers get started quickly and develop embedded applications efficiently.

Supported Platforms

The documentation covers product platforms based on mainstream processors such as:

- **NXP**
- **Rockchip**
- **TI**

Documentation content is regularly updated and maintained by the Forlinx team.

✂ Technical Support & Contact

If you encounter any issues or need assistance, please feel free to contact us:

- 🌐 **Official Website:** forlinux.net
- ✉ **Technical Support:** linux@forlinux.com, hardware@forlinux.com
- ✉ **Sales Inquiries:** sales@forlinux.com

**Thank you for choosing Forlinux Embedded products.
We are committed to supporting your development journey.**
